# Edit Yaml sections

Steps to Disable Achievements:

1. Open Visual Studio Code and navigate to the following path: (Your environment name)\Lib\site-packages\lib_resume_builder_AIHawk.
2. In this directory, open the gpt_resume_job_description.py file.
3. Comment out any code that contains the word "achievements."
4. In the plain_text_resume.yaml file, located in the home directory of Auto_Jobs_Applier_AiHawk, set the achievements field to be blank, as shown below:

By following these steps, you will disable the achievements section.

Steps to Remove Legal Authorization:

1. Open Visual Studio Code and locate the following file:
   Auto_Jobs_Applier_AIHawk\src\job_application_profile.py.
2. Search for "legal_authorization" and comment out all instances, including any stringsor functions associated with it.
3. Next, open Auto_Jobs_Applier_AIHawk\assets\resume_schema.yaml and follow the same process. set the leagal_authorization field to be blank, as shown below

Steps to Convert Salary from USD to Another Currency:

1. Open Visual Studio Code and navigate to the following file:
   Auto_Jobs_Applier_AIHawk\src\job_application_profile.py.
2. Search for "salary" and replace any references to USD with your preferred currency.
3. Open the Auto_Jobs_Applier_AIHawk\assets\resume_schema.yaml file and make the same changes for the salary field.
4. Finally, open myenv\Lib\site-packages\lib_resume_builder_AIHawk\resume.py and modify the salary currency there as well.
5. Make sure to change the salary in plain_text_resume.yaml file for example
   - If im converting my salary to inr I will be using the variable
   - salary_range_inr so make sure to replace this reference

Steps to remove Grades and Exam:

1. Open this file Auto_Jobs_Applier_AIHawk\assets\resume_schema.yaml

2.Comment the exam part in the file as shown in the below image:

```yaml
education_details:
  type: array
  items:
    type: object
    properties:
      degree: {type: string}
      university: {type: string}
      gpa: {type: string}
      graduation_year: {type: string}
      field_of_study: {type: string}
      # exam:
      #   type: object
      #   additionalProperties: {type: string}
    required: [degree, university, gpa, graduation_year, field_of_study]
```

3.Open this file" myenv\Lib\site-packages\lib_resume_builder_AIHawk\resume.py" and comment as shown in the file

```python
class EducationDetails(BaseModel):
    degree: Optional[str]
    university: Optional[str]
    gpa: Optional[str]
    graduation_year: Optional[int]
    field_of_study: Optional[str]
    # exam: Optional[Union[List[Dict[str, str]], Dict[str, str]]]
```
